TOUGH DOESN'T QUIT

When we say we put our machines to the test, we mean it. That's why we were the first in the industry to introduce a STEELDRIVE transmission, increased the towing capacity to 1,587 KG and upped the bed payload to 680 KG. You don't stop at good enough and neither will we, because tough doesn't quit.

THE AMERICAN POWERSPORTS CO.

At Polaris, we believe being an American company isn't a sales pitch; it's a way of doing business. It's the place we call home. The place our riders call home.

It all began here in America—over 70 years ago—in a small factory in Roseau, Minnesota. There, our founders forged a company built on American values, grit and ingenuity. That factory is not so small anymore and still operates to this day—creating jobs and producing the best our industry has to offer. The best America has to offer.

Today, we continue to design, engineer and test our industry-leading vehicles with owners like you—right here on American dirt, sand, snow and soil.
